

# LipidEnergy

Lipid-based complex obtained from a mixture of Medium-Chain Triacylglycerols, Isomers of Conjugated Linoleic Acid, Alpha-Linolenic Acid, and Oleic Acid Omega 9.

## Benefits:

- The ingredients in LipidEnergy have been proven to offer ergogenic, performance, and muscle mass increase benefits.
- Modification of the metabolic mechanisms through influence on enzymes for fat oxidation and energy availability
- Activation of specific cell receptors for fat to energy transformation and fat storage reduction, enabling the use of Lipids as an additional source of energy and sparing muscle glycogen reserves
- Provides the necessary fatty acids to maintain a healthy cardiovascular function and muscle and cartilage maintenance and recovery
- Easy and direct entrance to the body's blood flow

## Applications:

Powdered drinks, supplements, drinks, bars
